Explanations	

In line with our company's sustainability goals, and as part of our commitment to reducing emissions by 46.2% by 2030 compared to the 2019 baseline and reaching net zero by 2050, after Izmit production facility, Kordsa Indonesia production facility has also been awarded the ISCC (International Sustainability Carbon Certification) Plus Certification. With this certification, Kordsa has once again validated that its production model for recycled polyester yarn, single end cord, and cord fabric meets international sustainability standards.

This certification, valued in the purchasing processes of tire manufacturers, enables Kordsa to enhance its competitive strength in the global market and contributes to the reintegration of end-of-life materials into the production cycle.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
